SUBJECT INDEX

Ab initio computational techniques
The mutation of chemistry: the rising importance of ab initio computational techniques in chemical research, 5

Benzenoids
Current status of isomer enumeration of practical benzenoids, 155
Bilateral synthesis
Computer-assisted bilateral synthesis design: a status report, 73
Biomolecules
Maximum electrostatic similarity between biomolecules optimizing both relative positions and conformations, 437
Bond localized orbitals
Configuration-interaction method using bond localized orbitals as building blocks for macromolecules, 67
Born–Oppenheimer approximation
Quantum chemistry beyond the Born–Oppenheimer approximation, 17

C_2
Doubly excited states of C_2, C_2^+, and C_2^{2+}, 213
C_2^+
Doubly excited states of C_2, C_2^+, and C_2^{2+}, 213
C_2^{2+}
Doubly excited states of C_2, C_2^+, and C_2^{2+}, 213
CH_2^+
Theoretical study on the electronic states of CH_2^+, 205
Chemical reaction barriers
Theoretical studies of hydride transfer reactivity: transition structures and the origin of chemical reaction barriers, 399
Closed circular DNA
Theory of supercoil-induced *B–Z* transition in closed circular DNA, 431

1,2-Dithiete
An ab initio study of the structure and electronic spectrum of 1,2-dithiete and 1,2-dithiin, 287

1,2-Dithiin
An ab initio study of the structure and electronic spectrum of 1,2-dithiete and 1,2-dithiin, 287

Electron correlation
Electron correlation and solvation effects. Part 3. Influence of the basis set and the chemical composition on the solvation energy components evaluated with the quantum mechanical polarizable continuum model, 295
π-Electronic structure
The π-electronic structure and spectra of the *p*-polyphenyls, 235
Electrostatic similarity
Maximum electrostatic similarity between biomolecules optimizing both relative positions and conformations, 437
Energy and shape analysis
An energy and shape analysis along reaction paths of chemical reactions. The case of hydrogen–deuterium exchange, 323
Extremum method
The extremum method in quantum chemistry. Part II. Introduction to some applications, 47

HeH^+
A theoretical study of Markovnikov and anti-Markovnikov protonation of olefines by HeH^+, 401
Hydride transfer
Theoretical studies of hydride transfer reactivity: transition structures and the origin of chemical reaction barriers, 339
Hydrocarbon radical cations
Electronic and hyperfine structures of hydrocarbon radical cations, 263
Hydrogen–deuterium exchange
An energy and shape analysis along reaction paths of chemical reactions. The case of hydrogen–deuterium exchange, 323
Hydrogen-electrode processes
A refined theoretical investigation of the hydrogen-electrode processes of an acidic hydrogen–oxygen fuel cell, 313

Hydrogen–oxygen fuel cell
A refined theoretical investigation of the hydrogen-electrode processes of an acidic hydrogen–oxygen fuel cell, 313

Intermolecular complexes
Substitution, addition and elimination reactions: a quantum chemical study of intermolecular complexes, 387
Isomer enumeration
Current status of isomer enumeration of practical benzenoids, 155
Local spin density functional theory
Electronegativity and hardness of molecular groups from the localized electronegativity group orbital (LEGO) and generalized exchange local spin density functional (LSD-GX) theories, 83
Localized electronegativity group orbital theory
Electronegativity and hardness of molecular groups from the localized electronegativity group orbital (LEGO) and generalized exchange local spin density functional (LSD-GX) theories, 83

Macromolecules
Configuration-interaction method using bond localized orbitals as building blocks for macromolecules, 67
Markovnikov and anti-Markovnikov protonation
A theoretical study of Markovnikov and anti-Markovnikov protonation of olefins by HeH^+, 401
Molecular structure of elucidation
An expert system for molecular structure elucidation based on spectral data, 191
Mutation of chemistry
The mutation of chemistry: the rising importance of ab initio computational techniques in chemical research, 5

Nuclear motion
On nuclear motion and the definition of molecular structure, 13

Olefines
A theoretical study of Markovnikov and anti-Markovnikov protonation of olefines by HeH^+, 401
Organic polymers
Recent developments in the quantum theory of organic polymers, 127
Oxybispyridine
Photoelectron spectra of the six isomers of oxybispyridine, 219

Photoelectron spectra
Photoelectron spectra of the six isomers of oxybispyridine, 219
p-Polyphenyls
The π-electronic structure and spectra of the *p*-polyphenyls, 235
Protein Kinase C inhibitors
Structural investigation of protein kinase C inhibitors, 419

Quantum mechanical polarizable continuum model
Electron correlation and solvation effects. Part 3. Influence of the basis set and the chemical composition on the solvation energy components evaluated with the quantum mechanical polarizable continuum model, 295
Quantum theory
Recent developments in the quantum theory of organic polymers, 127

Solvation effects
Electron correlation and solvation effects. Part 3. Influence of the basis set and the chemical composition on the solvation energy components evaluated with the quantum mechanical polarizable continuum model, 295
Substituent constants
New description of the substituent effect on electronic spectra by means of substituent constants. Part VII. Electronic spectra of substituted benzenes, 247
Substituent effect on electronic spectra
New description of the substituent effect on electronic spectra by means of substituent constants. Part VII. Electronic spectra of substituted benzenes, 247
Substituted benzenes
New description of the substituent effect on electronic spectra by means of substituent constants. Part VII. Electronic spectra of substituted benzenes, 247

Supercoil-induced *B–Z* transition
Theory of a supercoil-induced *B–Z* transition in closed circular DNA, 431

Theory
On the importance of theory in the future development of chemistry, 1
Transition structures
Theoretical studies of hydride transfer reactivity: transition structures and the origin of chemical reaction barriers, 339

Uneven sulfuranes
Conformationally induced doubly degenerate uneven sulfuranes, 143

Vinyl ethers
Ab initio investigation of the structure and reactivity of vinyl ethers, 349
